# Monitor Services: how it is put together

Monitor-services is a Cybersecurity tool that monitors critical service status, with a focus on system monitoring and alerts.

sketched from the files

# Monitor Services: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

# Product map: what Monitor Services is for

## WHAT IT IS

Monitor-services is a cybersecurity tool that monitors critical service status, with a focus on system monitoring and alerts.

## WHAT GOES IN

The files at the top of the tree: main.py, README.md, banner.png.

## WHAT COMES OUT

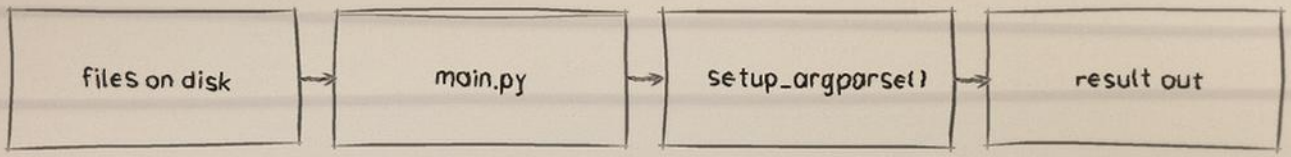

What the top files produce when they run or get read. Nothing else is promised.

## WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand,

# Monitor Services: data flow, in one direction

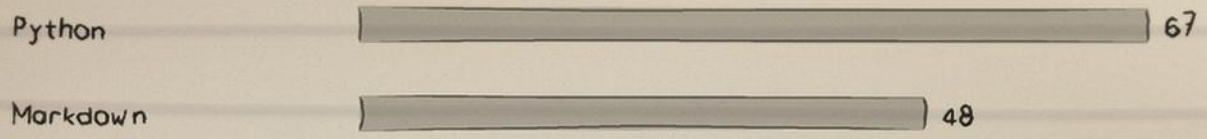

One direction. Anything the code does not do is not drawn.

second sheet, OK

# Monitor Services in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

5 files in the tree.
7 commits, first 2025-01-01, last 2026-10-30, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

# Monitor Services: schematic of the apparatus

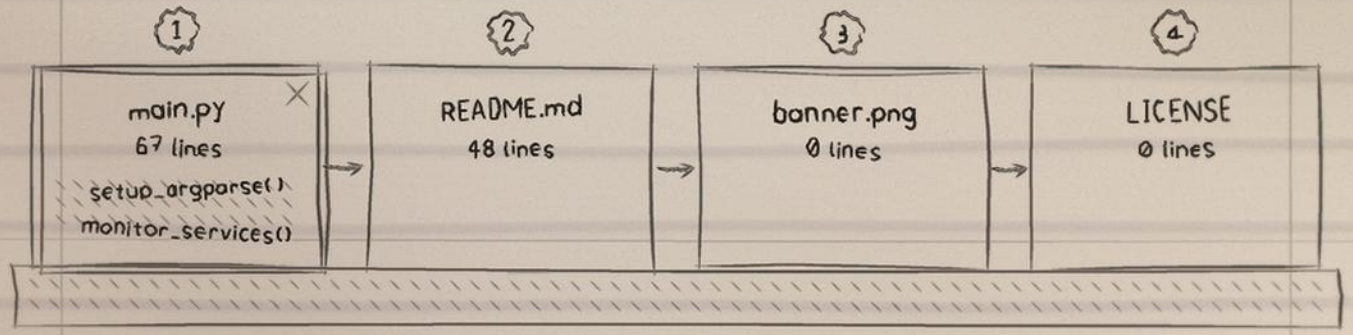

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. main.py
2. README.md
3. banner.png
4. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 5 files, 115 lines counted

turns of the crank so far: 7 commits, 2025-01-01 to 2026-10-30

measured and sketched, GK
